

United Living Foundation

COVID-19 Pandemic impacted each life and has brought high level vulnerability to the Homeless population. Neither do they have savings, social support nor being able to access food, water & proper care of the health and hygiene. Any ignorance at this point in time can be Fatal. In such a critical situation where they are exposed to health hazards, we need to come forward to help them face the new threat and survive in this catastrophe. Social distancing and self-isolation is impossible in the spaces where homeless people survive.

How can they protect themselves 'Stay Safe Stay Home !?

There are 1 million homeless people as per last census.

Virus does not differentiate; but the poor living conditions, lack of social support and less access to the information related to COVID19 can potentially contribute to more serious problems and worsen the existing challenges for all of us. Majority of the homeless suffer from the health issues due to lack of access to food, shelter & health related illness and other basic amenities. This increases the negative coping strategies making them more vulnerable and prone to be infected very easily by COVID-19.

As we know that precaution is the only prevention from the COVID-19. With your support and our effort we can ensure that the needy & homeless people living in the open on street and in the shelter should get at least Shelter, Healthcare & Meals so they do not sleep hungry; or else they will be at high risk of adverse impact from the crisis.

The support will be through supplies of dry ration along with Hygiene kit to each homeless individual for two months to safeguard themselves during the outbreak and the nationwide lockdown. Disinfection of their shelter, educating them by creating awareness about recommended hygiene, ensuring that they have access to accurate relevant information on the diseases and their prevention from COVID'19.

United Living Foundation a trust strongly believe in " live love & do" and through its work and action strives to reach the most needy and vulnerable communities to alleviate human suffering arising out of Pandemic. Your support will help reach the homeless in times of this crisis and able to meet the humanitarian needs with dignity by providing a lending hand for their survival. Your kind gesture is of utmost importance right now. Every single rupee will be a great help. Even that 1 rupee you may want to contribute will make a difference in their lives. Their eyes are on us and they are counting on us for their survival. UNITED LIVING FOUNDATION A REGD TRUST along with its partners will engage and coordinate with people, CSOs, local and state authorities through coordinated actions to reach the communities at high risk to safeguard their health and well being.
